Columbia County, Florida

OUT-OF-COUNTY Mobile Home Inspection Report

Notice of Mobile Home Permit Process

Please be advised that the out-of-county mobile home inspection report must be completed by the licensed mobile home installer while the home is still outside of the county. Once the report is approved, the applicant will be notified via email and will be cleared to move the home into the county.

Upon arrival in the county, a pre-inspection must be scheduled with our building inspectors to ensure the home is in decent condition. Any necessary repairs or issues identified by the inspector will be noted during the in-county inspection and must be completed before scheduling the final inspection.

WIND ZONE I mobile homes will NOT be permitted. Mobile homes prior to 1977 are pre-hud and the WIND ZONE must be proven to be permitted.

DATE OF INSPECTION: 12-28-25

COUNTY MOBILE HOME IS CURRENTLY IN Columbia

OWNERS NAME Debbie Ortiz
