TO: Troy Crews, Chief Building Official, Columbia County

FR: Dale Williams, Owner/Builder, Addition to Personal Residence

RE: Application for Building Permit

The original permit for this addition was pulled in 2011. The addition was constructed to a point and work on the project ceased. This permit application will allow for the completion of the addition.

Under the initial permit, additions on the north and south side of the house were constructed. The additions created a new living room, utility room, mudroom, and garage. These additions included concrete foundations (with stem walls), framing (2X6), new roofing (including the existing house), windows and doors for the addition, rough-in plumbing, rough-in electrical (partial), and HVAC duct work.

To complete the project, two phases will be performed:

- 1.) PHASE 1** – Complete the rough-in electrical, make minimum modifications to the previously installed rough-in plumbing, wire for CATV, insulate, install all finish materials including a garage door.
- 2. PHASE 2** – Reface kitchen cabinets, refinish hardwood floors, install finish electrical and plumbing, and repaint interior surfaces.

While the project is requested to be permitted as an owner/builder (as was the initial permit), I am hiring SLK Construction to assist with the project when needed. If you have any questions, please feel free to contact myself or Sammy Keen with SLK Construction. Please advise as to the permit fee. Thank you.
