

I, Allen Pope, am requesting a revision to my proposed metal building under application #75075. The originally proposed structure measured 24' x 30' x 10' with a 12' x 30' x 7' lean-to. I am increasing the size to 24' x 40' x 10' with a 12' x 40' x 7' lean-to.

I understand that I am required to submit an updated site plan reflecting the revised building dimensions and applicable setbacks. I acknowledge that my existing generic metal building plans remain applicable to the revised structure size and that no additional building plans are required at this time.

I submit this statement for review and approval of the requested revision.
