Dear Applicant:

This will acknowledge receipt of an application dated 06/16/2026 for a permit to use an existing onsite sewage treatment and disposal system located on the above referenced property.

From a review of your completed application, it has been determined that your existing system appears to meet the minimum standards of F.A.C. 62-6 for the proposed use. It is approved for use with the plans submitted to this office. If this system should fail, causing an unsanitary condition to exist, steps must be taken to bring the system into compliance immediately. Department approval of the system does not guarantee satisfactory performance for any specific period of time. Any change in material facts which served as a basis for issuance of this approval requires the applicant to modify the permit application. Such modification may result in this approval being made null and void. Issuance of this approval does not exempt the applicant from compliance with other Federal, State, or Local Permitting required for development of this property.

If you have any questions on this matter, please call our office at (386) 785-1058.

Sincerely,

Dustin Jones, Environmental Supervisor I
