Map

PERMIT NUMBER

POCKET PENETROMETER TEST

The pocket penetrometer tests are rounded down to 500 psf or check here to declare 1000 lb. soil without testing.

X 150 X 150 X 150

POCKET PENETROMETER TESTING METHOD

1. Test the perimeter of the home at 6 locations.
2. Take the reading at the depth of the footer.
3. Using 500 lb. increments, take the lowest reading and round down to that increment.

X 150 X 150 X 150

TORQUE PROBE TEST

The results of the torque probe test is 285 in. lbs. or check here if you are declaring 5" anchors without testing. A test showing 275 inch pounds or less will require 4 foot anchors.

Note: A state approved lateral arm system is being used and 4 ft. anchors are allowed at the sidewall locations. I understand 5 ft anchors are required at all centerline tie points where the torque test reading is 275 or less and where the manufacturer requires anchors with 4000 lb. pulling capacity.

Installer's initials

ALL TESTS MUST BE PERFORMED BY A LICENSED INSTALLER

Installer Name

Date Tested

6-11-07

Electrical

Connect electrical conductors between multi-wide units, but not to the main power source. This includes the bonding wire between multi-wide units. Pg.

Plumbing

Connect all sewer drains to an existing sewer tap or septic tank. Pg.

Connect all potable water supply piping to an existing water meter, water tap, or other independent water supply systems. Pg.

Site Preparation

Debris and organic material removed Pad Other
Water drainage: Natural Swale

Fastening multi-wide units

Floor: Type Fastener: Length: Spacing: 24" gal
Walls: Type Fastener: Length: Spacing: 24" gal
Roof: Type Fastener: Length: Spacing: 24" gal
For used homes min. 30 gauge, 8 wide, galvanized metal strip will be centered over the peak of the roof and fastened with galv. roofing nails at 2" on center on both sides of the centerline.

Gasket (weatherproofing requirement)

I understand a properly installed gasket is a requirement of all new and used homes and that condensation, mold, mildew and buckled marriage walls are a result of a poorly installed or no gasket being installed. I understand a strip of tape will not serve as a gasket.

Installer's initials

Type gasket

Installed:

- Between Floors Yes
- Between Walls Yes
- Bottom of ridgebeam Yes

Weatherproofing

The scotlombcard will be repaired and/or taped. Yes
Siding on units is installed to manufacturer's specifications. Yes
Fireplace chimney installed so as not to allow intrusion of rain water. Yes

Miscellaneous

Skirting to be installed. Yes No
Dryer vent installed outside of skirting. Yes N/A
Range downflow vent installed outside of skirting. Yes
Drain lines supported at 4 foot intervals. Yes
Electrical crossovers protected. Yes
Other:

Installer verifies all information given with this permit worksheet is accurate and true based on the manufacturer's installation instructions and or Rule 15C-1 & 2

PERMIT NUMBER

POCKET PENETROMETER TEST

The pocket penetrometer tests are rounded down to 50 psf or check here to declare 1000 lb. soil without testing.

x 1500 x 1500 x 1600

POCKET PENETROMETER TESTING METHOD

1. Test the perimeter of the home at 6 locations.
2. Take the reading at the depth of the footer.
3. Using 500 lb. increments, take the lowest reading and round down to that increment.

x 1500 x 1500 x 1600

TORQUE PROBE TEST

The results of the torque probe test is 905 inch pounds or check here if you are declaring 5" anchors without testing. A test showing 275 inch pounds or less will require 4" foot anchors.

Note: A state approved lateral arm system is being used and 4 ft. anchors are allowed at all the sidewall locations. Understand 5 ft anchors are required at all centerline tie points where the torque test reading is 275 or less and where the mobile home manufacturer may require anchors with 4000 lb. holding capacity.

Installer's initials RM

ALL TESTS MUST BE PERFORMED BY A LICENSED INSTALLER

Installer Name Timothy R. Rasmussen

Date Tested _____

Electrical

Connect electrical conductors between multi-wide units, but not to the main power source. This includes the bonding wire between multi-wide units. Pg. _____

Plumbing

Connect all sewer drains to an existing sewer tap or septic tank. Pg. _____

Connect all potable water supply piping to an existing water meter, water tap, or other independent water supply systems. Pg. _____

Site Preparation

Debris and organic material removed Swale Pad Other

Fastening multi wide units

Floor: Type Fastener: 1/2" x 3" galv Length: 6 Spacing: 24" on center
 Walls: Type Fastener: 1/2" x 3" galv Length: 6 Spacing: 24" on center
 Roof: Type Fastener: 1/2" x 3" galv Length: 6 Spacing: 24" on center
 For used homes a min. 30 gauge, 8" wide, galvanized metal strip will be centered over the peak of the roof and fastened with galv. roofing nails at 2" on center on both sides of the centerline.

Gasket (weatherproofing requirement)

I understand a properly installed gasket is a requirement of all new and used homes and that condensation, mold, mildew and buckled marriage walls are a result of a poorly installed or no gasket being installed. I understand a strip of tape will not serve as a gasket.

Installer's initials RM

Type gasket Pg.

Installed:
 Between Floors Yes
 Between Walls Yes
 Bottom of ridgebeam Yes

Weatherproofing

The bottomboard will be repaired and/or taped. Yes No
 Siding on units is installed to manufacturer's specifications. Yes No
 Fireplace chimney installed so as not to allow intrusion of rain/water. Yes No

Miscellaneous

Skirting to be installed. Yes No
 Dryer vent installed outside of skirting. Yes No
 Range downflow vent installed outside of skirting. Yes No
 Drain lines supported at 4 foot intervals. Yes No
 Electrical crossovers protected. Yes No
 Other _____

Installer verifies all information given with this permit worksheet is accurate and true based on the

manufacturer's installation instructions and or Rule 15C-1 & 2

Addressing Maintenance

To maintain the Countywide Addressing Policy you must make application for a 9-1-1 Address at the time you apply for a building permit. The established standards for assigning and posting numbers to all principal buildings, dwellings, businesses and industries are contained in Columbia County Ordinance 2001-9. The addressing system is to enable Emergency Service Agencies to locate you in an emergency, and to assist the United States Postal Service and the public in the timely and efficient provision of services to residents and businesses of Columbia County.

WARRANTY DEED

THIS INSTRUMENT, made this 26th day of June, 2007, between
DINORA D. MARTINEZ, who does not reside on the property, whose
address is 11702 SW Tuskenuggee Avenue, Fort White, Florida 32038,
Grantor, and PHILLIP M. SMITH, whose address is 2720 SW Windsong
Circle, Apt. 204, Lake City, Florida 32025, Grantee,

WITNESSETH:

That said Grantor, for and in consideration of the sum of TEN
AND NO/100 (\$10.00) DOLLARS, and other good and valuable
considerations to said Grantor in hand paid by said Grantee, the
receipt whereof is hereby acknowledged, has granted, bargained and
sold to the said Grantee, and Grantee's heirs, successors and
assigns forever, the following described land, situate, lying and
being in COLUMBIA County, Florida, to-wit:

Lot 40, Block C, Hidden Hills Phase II, a subdivision as
recorded in Plat Book 7, pages 65-66, public records of
Columbia County, Florida. (Tax parcel number R08355-340)

SUBJECT TO: Taxes for 2007 and subsequent years; restrictions and
assessments of record; and assessments shown by a plat of the property.

And Grantor does hereby fully warrant the title to said land
and will defend the same against lawful claims of all persons
whomever.

IN WITNESS WHEREOF, Grantor has hereunto set her hand and seal
the day and year first above written.

Signed, sealed and delivered
in the presence of:
