

ADDENDA #1
BID NO. 2022-S
HERBICIDE SPRAYING

The Scope of Work is better described as spraying at the back of the right of way from the ground up to a height of 10 feet and to a depth of the edge of right of way. That portion of vegetation that encroaches over the right of way at the limits described in the aforementioned. The estimated 260 miles is per side and is the estimated volume to be completed annually and only at the request of the County on an as needed basis.
