Envelope Leakage Test Report (Blower Door Test)

Residential Prescriptive, Performance or ERI Method Compliance 2017 Florida Building Code, Energy Conservation, 6th Edition

Jurisdiction: Permit #:	2017 FIQ11	ua Bulluling Code, Error		
Address: 906 5 wcr 138 Unit: City: Ft White State: Zip: 32038 Air Leakage Test Results Possing results must meet either the Performance. Prescriptive. or ERI Method PRESCRIPTIVE METHOD. The building or dwelling unit shall be tested and verified as having an air leakage rate of not exceeding 7 air changes per hour at a pressure of 0.2 inch wg. (50 pascals) in Climate Zones 1 and 2. PREFORMANCE or ERI METHOD. The building or dwelling unit shall be tested and verified as having an air leakage rate of not exceeding 7 air the selected ACH(50) value, as shown on CoRM R405-2017 (Performance) or R406-2017 (ERI), section labeled as Infiltration, sub-section ACH. ACH(50) specified on Form R405-2017 Energy Colc (Performance) or R406-2017 (ERI). PRESCRIPTIVE METHOD. The building or dwelling unit shall be tested and verified as having an air leakage rate of not exceeding the selected ACH(50) value, as shown on CoRM R405-2017 (ERI), section labeled as Infiltration, sub-section ACH. ACH(50) specified on Form R405-2017 (ERI). When ACH(50) is less than 3, Mechanical Ventilation Installation must be verified by building degarrment. Testing. Testing shall be conducted in accordance with ANSI/MESNET/ICC 380 and reported at a pressure or 0.2 inche wg. (50 Pascals). Testing shall be conducted by either individuals as defined in Section 553.993(5) or (7). Provide Statues, or Individuals licensed as set forth in Section shall be conducted by either individuals as defined in Section 553.993(5) or (7). Provide Statues, or Individuals licensed as set forth in Section shall be conducted by either individuals as defined in Section 553.993(5) or (7). Provide Statues, or Individuals licensed as set forth in Section shall be conducted by the party conducting the test and provided to the code afficial. Testing shall be performed at any time after creation of all penetrations of the building thermal envelope. During testing: Itexterior windows and doors, fireplace and stove doors shall be closed, but not sealed, beyond the intended w	Jurisdiction:		Permit #:

Air Leakage Test Results Possing results must meet either the Performance, Prescriptive, or ERI Method PRESCRIPTIVE METHOD. The building or dwelling unit shall be tested and verified as having an air leakage rate of not exceeding 7 air changes per hour at a pressure of 0.2 inch w.g. (50 pascals) in Climate Zones 1 and 2. PREFORMANCE or ERI METHOD. The building or dwelling unit shall be tested and verified as having an air leakage rate of not exceeding 7 air the selected ACH(50) value, as shown on TOMR RA05-2017 (Performance) or RA06-2017 (ERI), section labeled as infiltration, sub-section ACH, ACH(60) specified on Farm RA05-2017-Energy Colc (Performance) or RA06-2017 (ERI). PASS FAIL When ACH(50) is less than 3, Mechanical Ventilation Installation must be verified by building department. Testing. Testing shall be conducted in accordance with ANSI/RESNET/ICC 380 and reported at a pressure or 0.2 inche w.g. (50 Pascals). Testing shall be conducted by either individuals as defined in Section 533-99(5) or (7). Florido Stotues, or Individuals lensed as set forth in Section 1831-1810 (g.) or (i) or an approved third party. A written report of the results of the test shall be signed by the party conducting the test and approved to the code official. Testing shall be performed at any time after creation of all penetrations of the building thermal envelope. During testing: 1. Exterior windows and doors, fireplace and stove doors shall be closed, but not sealed beyond the intended weatherstripping or other infiltration control measures. 2. Dampers including exhaust, intake, makeup air, back draft and flue dampers shall be closed, but not sealed beyond intended infiltration control measures. 3. Interior doors, if installed at the time of the test, shall be open. 4. Exterior of words for continuous ventilation systems and heat recovery ventilators shall be closed and sealed. 5. Heating and cooling systems, if installed at the time of the test, shall be open. 4. Exterior doors for continuous ventilation syste		ches Community:		Lot:
