The image shows a close-up, high-angle view of a roof being waterproofed. Large, overlapping sheets of grey 'Storm Guard' membrane are being installed. The brand name 'STORM GUARD' is printed in large, bold, black letters across the sheets. Below it, 'TopShield Product' is written in a smaller font. A wooden board, likely a 2x4, is laid across the middle of the roof, with the number '85' and the letters 'MS' handwritten in red marker on its side. The roof surface is covered with numerous red circular fasteners or staples. In the background, a worker wearing an orange long-sleeved shirt and blue jeans is visible on the roof, working on the edge. The surrounding area includes green trees and a wooden fence, suggesting a residential setting. The lighting is bright, casting shadows on the roof.
