Yes. We are aware and understand. My pool days are over. Any other structures in the future will be on the far side within the setbacks.

Good morning Matt,

Just wanted to touch base with you about the Jewett Project. In reviewing the permit application I see that the home sits right on the 200' buffer line. We wanted to make sure your clients understood that they would never be able to put any structure, pool, etc. behind their home. Please let us know so we can move forward with the review process. Have a great day.

Sincerely,

Liza Williams
