

Roof Edge Protection System
This system is designed to provide a secure and durable edge finish for your roof. It is made of high-quality aluminum and is easy to install. The system includes a metal cap and a series of screws that hold it in place. The cap is designed to fit over the edge of the roof, providing a finished look and protecting the underlying structure. The screws are spaced evenly along the length of the cap to ensure a tight fit. The system is suitable for use on a variety of roof types, including asphalt shingle roofs. It is a cost-effective solution for improving the appearance and durability of your roof edge.

Technical Specifications:
Material: Aluminum
Color: Silver
Length: 10 feet
Width: 4 inches
Height: 1 inch
Screw Spacing: 24 inches
Weight: 15 lbs.

Installation Instructions:
1. Remove any existing edge material.
2. Measure the length of the roof edge and cut the cap to size.
3. Position the cap over the edge of the roof.
4. Secure the cap with the provided screws, spaced 24 inches apart.
5. Check the cap for a tight fit and adjust as necessary.

Warranty:
This system is warranted against manufacturing defects for a period of 10 years.
