**Technician:** Cleveland English

As requested, a Universal Engineering Sciences Technician was present at the above referenced project site for the purpose of earthwork testing for the Zone 2.

While on site, the technician observed the general condition of the areas to be tested and performed 10 density tests for Zone 2. The tests were performed in accordance with the ASTM D-6938 Nuclear Gauge Method and were found to meet the project compaction requirements of 95% of the maximum dry density per ASTM D-1557.

The Contractor was notified of the test results or a copy was left for their records.
