POCKET PENETROMETER TESTING METHOD

1. Test the perimeter of the home at 6 locations.
2. Take the reading at the depth of the footer.
3. Using 500 lb. increments, take the lowest reading and round down to that increment.

TORQUE PROBE TEST

The results of the torque probe test is 350 inch pounds or check here if you are declaring 5' anchors without testing. A test showing 275 inch pounds or less will require 5 foot anchors.

**Note:** A state approved lateral arm system is being used and 4 ft. anchors are allowed at the sidewall locations. I understand 5 ft anchors are required at all centerline tie points where the torque test reading is 275 or less and where the mobile home manufacturer may requires anchors with 4000 lb holding capacity.

RE: Mary Lee Jackson Estate

Please find attached a letter received from Lynward Jones regarding the above referenced estate. The letter was submitted at my request following a phone call between Mr. Jones and I.

A niece of Mr. Jones will be making application for a mobile home permit on the property. The property is part of an estate where all heirs can not be located. This was determined when a previous permit application was filed on the same parcel. Mr. Jones was allowed to sign in behalf of the estate.

As the issue with the estate continues, it will be necessary to allow Mr. Jones to again sign in behalf of the estate. Please advise if I may be of further assistance.
