Certificate Partial Termite Treatment or Intent to Install Termite Bait Stations

Owner:

Treatment Address: 273 Southwest Hermitage Glen High Springs, FL 32643

Subdivision:

Lot #: **County:** Alachua

General Contractor:

Date: 2/27/2023 **Type of Treatment:** ☒ Soil ☐ Wood ☐ Bait Stations

The above address has received the initial required subterranean termite preventative treatment OR there is intent to install Termite Bait Stations after the final grade/landscaping. If a soil treatment was performed, the perimeter must be treated after the final grade has been completed in accordance with the pesticide label and Florida Statute.

This is NOT proof of Warranty or a final treatment for Certificate of Occupancy or Closing.
Warranty and final treatment certification will be issued upon completion of the final treatment only.
This form is for inspection, construction, and financial draw purposes only.

Notice to General Contractor

If a soil treatment was performed, it is the responsibility of the Contractor to notify DW Pest Control prior to the pouring of any slab that abuts to the above structure. Some examples include: patios, porches, entryways, A/C pads, additions, driveway aprons, pool decks and sidewalks.

Areas that require treatment (for soil treatments):

- Any part of the foundation fill that is disturbed after the initial treatment
- The foundation perimeter after final grade has been completed
