re: ELEVATION LETTER – 460 SW MARYNIK DRIVE, HIGH SPRINGS, FL

As requested, I inspected the building site for the proposed construction at the above referenced site. Per the flood report by SRWMD, there are no wetlands or floodplains on the site. Refer to the attached site plan by others.

The topography of the site drains to the west. The finished floor elevation of the home shall be 12" above the adjacent ground for the entire perimeter of the foundation, except driveways and sidewalks which must be flush with the finished floor elevation. The finished floor of the home will be below required elevation of one foot above the adjacent road.

I certify that the minimum finished floor elevation listed above will protect the structure against water damage from a base flood event, as defined in Article 8 of the Land Development Regulations.

Should you have any questions, please don't hesitate to contact me.

Respectfully,

EFFECTIVE FLOOD INFORMATION REPORT

Location Information

County: **COLUMBIA**
Parcel: **167S1710006213**
Flood Zone: **X**
Flood Risk: **LOW**

1% Annual Chance Base Flood Elev*	Not Applicable
10% Annual Chance Flood Elev*	Not Applicable
50% Annual Chance Flood Elev*	Not Applicable

* Flood Elevations shown on this report are in NAVD 88 and are derived from FEMA flood mapping products, rounded to the nearest tenth of a foot. For more information, please see the note below

Legend with Flood Zone Designations

Watershed Santa Fe Map Effective Date 2/4/2009 Special Flood Hazard Area No

FIRM Panel(s) 12023C0513C

The information herein represents the best available data as of the effective map date shown. The Federal Emergency Management Agency (FEMA) Flood Map Service Center (<https://msc.fema.gov>) maintains the database of Flood Insurance Studies and Digital Flood Insurance Rate Maps, as well as additional information such as how the Base Flood Elevations (BFEs) and/or floodways have been determined and previously issued Letters of Map Change. Requests to revise flood information may be provided to the District during the community review period on preliminary maps, or through the appropriate process with FEMA [Change Your Flood Zone Designation | FEMA.gov](#). Information about flood insurance may be obtained at (<https://www.floodsmart.com>)

**Anywhere it can rain, it can flood
Know your risk.**

Base Flood Elevation (BFE)

The elevation shown on the Flood Insurance Rate Map for Zones AE, AH, A1-A30, AR, AO, V1-V30, and VE that indicates the water surface elevation resulting from a flood that has a one percent chance of equaling or exceeding that level in any given year.

A

Areas with a 1% annual chance of flooding and a 26% chance of flooding over the life of a 30-year mortgage. Because detailed analyses are not performed for such areas; no depths or base flood elevations are shown within these zones.

AE, A1-A30

Areas with a 1% annual chance of flooding and a 26% chance of flooding over the life of a 30-year mortgage. In most instances, base flood elevations derived from detailed analyses are shown at selected intervals within these zones.

AH

Areas with a 1% annual chance of flooding and a 26% chance of flooding over the life of a 30-year mortgage. Usually areas of ponding with flood depths of 1 to 3 feet. Base Flood Elevations are determined.

AO

Areas with a 1% annual chance of flooding and a 26% chance of flooding over the life of a 30-year mortgage. Usually areas of sheet flow on sloping terrain with flood depths of 1 to 3 feet. Base Flood Elevations are determined.

Supplemental Information:

10%-chance flood elevations (10-year flood-risk elevations) and 50%-chance flood elevations (2-year flood-risk elevations), are calculated during detailed flooding studies but are not shown on FEMA Digital Flood Insurance Rate Maps (FIRMs). They have been provided as supplemental information in the Flood Information section of this report.

AE FW (FLOODWAYS)

The channel of a river or other watercourse and the adjacent land areas that must be reserved in order to discharge the base flood (1% annual chance flood event). The floodway must be kept open so that flood water can proceed downstream and not be obstructed or diverted onto other properties.

Please note, if you develop within the regulatory floodway, you will need to contact your Local Government and the Suwannee River Water Management District prior to commencing with the activity. Please contact the District at 800.226.1066.

VE

Areas with a 1% annual chance of flooding over the life of a 30-year mortgage with additional hazards due to storm-induced velocity wave action. Base Flood Elevations (BFEs) derived from detailed analyses.

X 0.2 PCT (X Shaded, 0.2 PCT ANNUAL CHANCE FLOOD HAZARD)

Same as Zone X; however, detailed studies have been performed, and the area has been determined to be within the 0.2 percent annual chance floodplain (also known as the 500-year flood zone). Insurance purchase is not required in this zone but is available at a reduced rate and is recommended.

X

All areas outside the 1-percent annual chance floodplain are Zone X. This includes areas of 1% annual chance sheet flow flooding where average depths are less than 1 foot, areas of 1% annual chance stream flooding where the contributing drainage area is less than 1 square mile, or areas protected from the 1% annual chance flood by levees. No Base Flood Elevations or depths are shown within this zone. Insurance purchase is not required in these zones.

RIVER RISE
RESIDENTIAL SUBDIVISION, UNIT 1
PLAT BOOK 8, PAGE 51
LOT 12

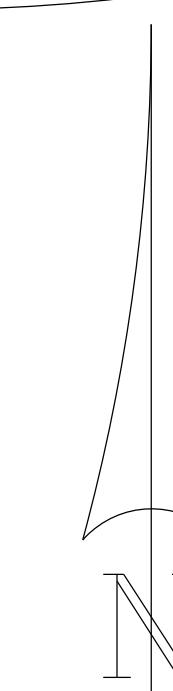

This architectural site plan illustrates a property layout. A large, irregularly shaped plot is bounded by a street on the right and a property line on the left. The plot contains two main structures: a "1-STORY FRAME RESIDENCE" and a "40'X60' BARN". The residence is oriented towards the left, while the barn is positioned further back on the plot. A "NEW WELL" is indicated near the center of the plot. The total width of the plot is marked as "399'-6\"", and the depth is marked as "146'-6\". The barn's dimensions are explicitly labeled as "40'X60'". To the right of the residence, a dimension line indicates a distance of "15'-0\" from the residence's rear wall to the property line. The plot is partially bordered by a hatched area representing a fence or boundary.

136'-0"
DISTANCE BETWEEN
WELL AND SEPTIC

A hand-drawn sketch showing a property boundary. At the top, a horizontal line is labeled "BUILDING SETBACK LINE". Below it, another horizontal line is labeled "PUBLIC RIGHT-OF-WAY LINE". A vertical dashed line extends downwards from the Public Right-of-Way line. On the left side, a double-headed arrow indicates a distance of "10' UTILITY EASEMENT(P)" between the two lines. On the right side, a double-headed arrow indicates a distance of "30'" between the two lines. The total length of the Public Right-of-Way line is labeled as "401.49'(P)" at the top and "401.53'" at the bottom. A label "CRETE CULVERT" is positioned to the left of the sketch. Below the sketch, the text "SOUTHWEST MARYNIK DRIVE" is written in large letters, followed by "(60' WIDE PUBLIC RIGHT-OF-WAY)" and "20' % P WIDE ASPHALT PAVED ROAD".
