Abstract

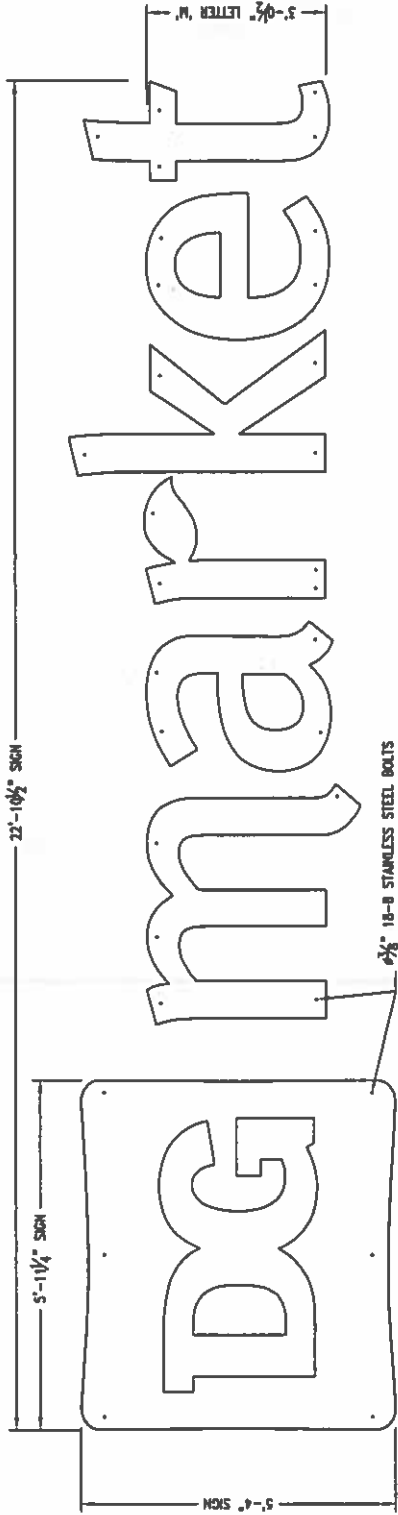

1. **What is the purpose of the study?** The purpose of the study is to determine the effect of the use of a mobile phone on the performance of a task.
2. **What is the research question?** The research question is: "Does the use of a mobile phone during a task affect performance?"
3. **What is the hypothesis?** The hypothesis is that the use of a mobile phone during a task will result in a decrease in performance.
4. **What is the independent variable?** The independent variable is the use of a mobile phone during the task.
5. **What is the dependent variable?** The dependent variable is the performance of the task.
6. **What is the control group?** The control group is the group of participants who did not use a mobile phone during the task.
7. **What is the experimental group?** The experimental group is the group of participants who used a mobile phone during the task.
8. **What is the data collection method?** The data collection method is a self-reporting questionnaire.
9. **What is the data analysis method?** The data analysis method is a t-test.
10. **What is the conclusion?** The conclusion is that the use of a mobile phone during a task results in a decrease in performance.
