

6/12 PITCH - 16" O/H

THE ARROW HEAD AT THE END OF THE TRUSS ON THE TRUSS PLATE END CORRESPONDS WITH THE LEFT SIDE OF THE STRUCTURE. THE ARROW HEAD AT THE END OF THE TRUSS ON THE TRUSS PLATE END CORRESPONDS WITH THE RIGHT SIDE OF THE STRUCTURE.

Notes:

No back charges will be accepted by Builders.

Expense unless approved in writing first.

800-832-1541

ACQ lumber is acceptable to truss plates. Any ACQ lumber that comes in contact with truss plates (i.e. embedded on truss plates) must have an approved barrier applied first.

Refer to BC-3-B1 Summary Sheet for handling, loading and fastening of Metal Plate Connected Wood Truss joist and blocking truss connections.

It is the responsibility of the Contractor to ensure that the truss design is properly installed and that the truss design is followed. If a truss design is not followed, the Contractor is responsible for the structural deterioration. If a truss design is not followed, it will be supplied at an extra cost by Builders.

It is the responsibility of the Contractor to make sure the truss design is followed. If a truss design is not followed, the Contractor is responsible for the structural deterioration. If a truss design is not followed, it will be supplied at an extra cost by Builders.

It is the responsibility of the Contractor to make sure the truss design is followed. If a truss design is not followed, the Contractor is responsible for the structural deterioration. If a truss design is not followed, it will be supplied at an extra cost by Builders.

It is the responsibility of the Contractor to make sure the truss design is followed. If a truss design is not followed, the Contractor is responsible for the structural deterioration. If a truss design is not followed, it will be supplied at an extra cost by Builders.

It is the responsibility of the Contractor to make sure the truss design is followed. If a truss design is not followed, the Contractor is responsible for the structural deterioration. If a truss design is not followed, it will be supplied at an extra cost by Builders.

It is the responsibility of the Contractor to make sure the truss design is followed. If a truss design is not followed, the Contractor is responsible for the structural deterioration. If a truss design is not followed, it will be supplied at an extra cost by Builders.
