Description	Crawlspace Rehabilitation- Option 2
Foundation Specialist	Randall Thompson
SFS Job #	25-0168
Foundation Specialist	Randall Thompson
Customer Phone #	386-853-0383

Product/Service	Description	Qty.
Foundation Assessment	<p>On September 9, 2025, a representative from Stable Foundation conducted an inspection of a two-story wood frame home with a crawlspace foundation with a metal roof. The visit was prompted by concerns regarding settlement occurring within the residence. Following a comprehensive evaluation, it was determined that the area surrounding the stairs leading to the second floor lacked adequate support, resulting in settlement and subsequent structural displacement.</p> <p>To address this issue, we recommend the installation of a submental 4 x 6 pressure-treated beam, complemented by crawlspace jacks positioned on both the new beam and one of the existing support beams beneath the stairwell. This solution aims to stabilize the structure and facilitate the lifting of the affected area as much as possible. Additionally, we advise the readjustment of the existing CMU support to further enhance the stability and lifting capacity of the home.</p>	1
Permit & Engineering	To gather all necessary documents for the Engineering and Building Department to issue a permit for the scope of work.	1
Crawl Space Jacks	<p>To ensure the proper installation of the specified quantity of adjustable crawlspace jacks, designed to guarantee the stabilization of the affected area, it is crucial to acknowledge that stabilization and any lifting endeavors are subject to field conditions. Please be informed that the complete restoration of the area to its original position cannot be guaranteed.</p> <p>For more information, we encourage you to review our one-year warranty for crawlspace jack adjustments:</p> <ul style="list-style-type: none"><li>- Adjustment within one year of the installation date: FREE</li><li>- Adjustment within one year of expiration: \$600</li><li>- Adjustment more than one year after expiration: \$800</li></ul> <p>Thank you for entrusting us with your project.</p>	12
