TO MAKE PROBE TEST

The results of the torque probe test is 110.2 inch pounds or check here if you are declaring 5 aircraft without testing. A total showing 275 inch pounds or less will require 5 foot structure.

A state approved lateral entry system is being used and 4 ft. anchors are allowed at the sidewalk locations. 1 unadorned 5 ft anchors are required at all candidate tie points where the torque test resulting is 275 or less and where the middle income manufacturers may require anchors with 4000 lb holding capacity.
