Subject: Flooding evaluation of Parcel 18-5S-16-03644-102(18021), located at 9716 CR 240 Lake City, Florida

1. This parcel is located in Zone X on both FEMA Flood Maps and the SRWMD website, therefore is not subject to base floods (100 yr.).
2. The USGS soil survey shows the soils on this parcel are porous well graded sand that generates very little run-off, the USGS Quadrangle maps show the elevations on this parcel range for elevation 80' to >75' and any surface run-off will flow to the southeast and then south with a similar or lower elevations.
3. The proposed house plans show the house is founded on a 2' high stem wall with a floor elevation 2' above natural ground.

Summary: I certify that the minimum finished floor elevation listed above will protect the structure against water damage from a base flood event, as defined in article 8 of the Land Development Regulation.
