re: ELEVATION LETTER – 417 NW HIGH POINT DRIVE, LAKE CITY, FL

As requested, I inspected the building site for the proposed construction at the above referenced site. The foundation walls for the home had been staked at the time of the inspection. The photo was taken from High Point Drive looking north.

Based on the LIDAR on the Columbia County website, the existing road centerline elevation varies between 130.5 +/- and 119.5 +/- . The finished floor elevation of the structure will be 123.00. The finished floor of the home will be below the required elevation of 132.0. The topography of the site drains to the south. The north side of the structure will be protected from direct precipitation with a swale to intercept any run-off and direct it to the east or west.

CAROL CHADWICK, P.E.

Page 2

I certify that the minimum finished floor elevation listed above will protect the structure against water damage from a base flood event, as defined in Article 8 of the Land Development Regulations.

Should you have any questions, please don't hesitate to contact me.

Respectfully,
