I visited the site today and it appears that the structure is graded properly as per the terms of my letter.

I have not checked the finish floor elevation of the house, nor did I do any other topographic measurements.

Sincerely,

David M. Winsberg

David,  
When can you get this done?

Adam per notes that were placed on permit for lot 13, we will need an e-mail or letter from Mr. Winsberg verifying that swale, dirt work, etc. was done properly to prevent water from running onto adjacent lots prior to C.O. thanks.
