PERMIT WORKSHEET

DOOKET DENETDOMETED TEXT	Site Preparation
The pocket penetrometer tests are rounded down to psf (or)	Debris and organic material will be removed and site prepared for adequate drainage?
Check here to declare 1000 lb. soil bearing capacity without testing.	Water drainage: Natural ☐ Swale ☐ Pad X Other
Check here 🔼 to declare 1000 lb. soil bearing capacity without testing.	
X X	Fastening multi wide units
1. Test the perimeter of the home at 6 locations 2. Take the reading at the depth of the footer.	Floor: Type Fastener: LAG Length: 5 Spacing: 24" Walls: Type Fastener: LAG Length: 5 Spacing: 24" Roof: Type Fastener: LAG Length: 5 Spacing: 24" For used homes a min. 30 gauge, 8" wide, galvanized metal strip will be
3. Using 500lb. increments, take the lowest reading	centered over the peak of the roof and fastened with galv. roofing nails at 2" on center on both sides of centerline.
and round down to that increment.	Gasket (weatherproofing requirement)
TORQUE PROBE TEST The result of the torque probe test isinch pounds (or) Check here to declare 5' anchors without testing. A test showing 275 inch pounds or less will require 5 foot anchors. Note: A state approved lateral arm system is being used and 4ft. anchors are allowed	I understand a properly installed gasket is a requirement of all new and used homes and that condensation, mold, mildew, and buckled marriage walls are a result of a poorly installed or no gasket being installed. I understand a strip of tape will not serve as a gasket. Installer's Initials
	Type gasket Foam To Be Installed: ☐ Between Floors ☐ Between Walls ☐ Bottom of ridgebeam
at the sidewall locations. I understand 5 ft. anchors are required at all centerline	Weatherproofing
tie points where the torque test reading is 275 or less and where the mobile home	The bottomboard will be repaired and/or taped? Yes ⊠
manufacturer may requires anchors with 4000lb holding capacity	Siding on units will be installed to manufacturer's specifications? Yes ☒
installer's initials	Fireplace chimney will be installed so as not to allow intrusion of rain water? Yes ☐ N/A ☒
ALL TESTS MUST BE PERFORMED BY A LICENSED INSTALLER	Miscellaneous
Installer Name	Skirting to be installed? Yes⊠ No□ Dryer Vent to be installed outside of skirting? Yes□ N/A☒ Downdraft Range vent will be installed outside of skirting? Yes□ N/A☒
Electrical Information	Drain lines will be supported at 4 foot intervals? Yes ☐
A licensed mobile home installer can connect electrical conductors including the bonding wire between multi-wide units. An electrical contractor's license is required to build the service and connect the home to the main power source.	Electrical crossovers will be protected? Yes Other:
Plumbing Information	
A licensed mobile home installer or a plumbing contractor can connect all sewer drains to an existing sewer tap or septic tank. In addition the installer can connect potable water	Installer verifies all information given with this permit worksheet is accurate and true based on the manufacturer's imptallation instructions and/or Rule 15C-1&2
