

- (1) This drawing is for anchor rod placement only and is not anchor rod true in size location, and projection.
- (2) Foundation must be square and level with all of anchor rods true in size, location, and projection.
- (3) This drawing must be held to keep track of each of finished conditions.
- (4) This structural design data includes magnitude and location of design loads and support conditions, material properties, and type and size of major structural members. It also includes the design of the anchor rods and the design of the base of this issue. Any change to building loads or dimensions may change structural member size and locations shown. This structural design data will be superseded by the next revision.
- (5) Anchor rod size is determined by shear and tension at the bottom of the base plate. The length of the anchor rod and method of load transfer to the foundation must be determined by the foundation engineer, and is not provided by the manufacturer.
- (6) Anchor rods are ASTM F1554, Gr. 36 material unless noted otherwise.
- (7) Anchor rods are 1/2" diameter unless noted otherwise.
- (8) Count base plate design data is assumed for the purpose of the design of the base of this issue.

ANCHOR ROD DESCRIPTION	QUANTITY
1" Ø DIAMETER X	72
1" Ø DIAMETER X	52
1" Ø DIAMETER X	32

ANCHOR BOLTS TO BE DESIGNED
BY FOUNDATION ENGINEER USING
DIAMETERS SHOWN IN THIS TABLE.

ANCHOR ROD DESCRIPTION	QUANTITY
3" Ø DIAMETER X	72
3" Ø DIAMETER X	52
1" Ø DIAMETER X	32
