POCKET PENETROMETER TEST

The pocket penetrometer tests are rounded down to 1000 psi or check here to declare 1000 lb. soil without testing.

X 1000 X _____ X _____

POCKET PENETROMETER TESTING METHOD

1. Test the perimeter of the home at 8 locations.
2. Take the reading at the depth of the footer.
3. Using 500 lb. increments, take the lowest reading and round down to that increment.

X _____ X _____ X _____

TORQUE PROBE TEST

The results of the torque probe test is NA 1100 foot pounds or check here if you are declaring 5 anchors without testing. A test showing 275 foot pounds or less will require 5 foot anchors.

Note: A state approved lateral arm system is being used and 4 ft. anchors are allowed at the sidewall locations. I understand 5 ft. anchors are required at all cantilevered footings where the torque test reading is 275 or less and where the mobile home manufacturer may require anchors with 4000 lb. holding capacity.

Installer's Initials

ALL TESTS MUST BE PERFORMED BY A LICENSED INSTALLER

Installer Name

Date Tested

Electrical

Connect electrical conductors between multi-wire units, but not to the main power source. This includes the bonding wire between multi-wire units. Pg. 11C1

Plumbing

Connect all sewer drains to an existing sewer tap or septic tank. Pg. 11C1
Connect all potable water supply piping to an existing water meter, water tap, or other independent water supply system. Pg. 11C1

Site Preparation

Debris and organic material removed Swale Pad Other

Fastening multi-wire units

Floor: Type Fastener: long 3 Length: 4" Spacing: 20"
Wall: Type Fastener: anchors Length: 4" Spacing: 24"
Roof: Type Fastener: 3/4" x 4" Length: 16" Spacing: 6"
For used homes a min. 30 gauges, 8" wide, galvanized metal strip will be centered over the peak of the roof and fastened with galv. roofing nails at 2' on center on both sides of the centerline.

Roofing (existing roofing not removed)

I understand a properly installed gasket is a requirement of all new and used homes and that condensation, mold, mildew and buckled roofing materials are a result of a poorly installed or no gasket being installed. I understand a strip of tape will not serve as a gasket.
