

# Live Oak Homes

3100 Ga Hwy 268 West

Broxton, GA 31519

912-359-2330

Date of Manufacture <b>2/22/2024</b>	Plant Number <b>2</b>
Manufacturer's Serial Number and Model Unit Designation <b>LOHGA20039670AB</b>	HUD No. <b>GEO1615934/GEO1615935</b>
Design Approval by (D.A.P.I.A.) <b>NTA, Inc.</b>	

This manufactured home is designed to comply with the federal manufactured home construction and safety standard in force at time of manufacture. The manufacturer certifies this home is compliant with the Title VI, Toxic Substances Control Act. (For additional information, consult owner's manual)

## The factory installed equipment includes:

Equipment	Manufacturer	Model Designation
Heating	N/A	N/A
Cooking	AMANA	ACR4203MNB0
Refrigerator	AMANA	ART308FFDB10
Water Heater	RHEEM	E40 2 RH MH
Dishwasher	AMANA	ADB1400AMB0
Fireplace	N/A	N/A
Stereo	N/A	N/A
Microwave	N/A	N/A

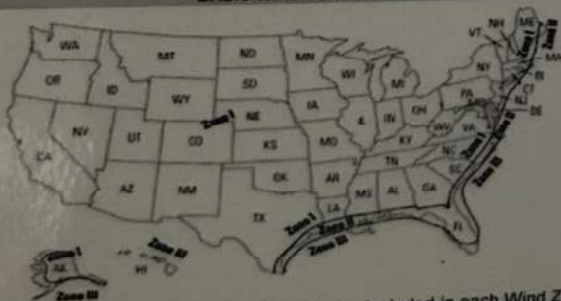

HOME CONSTRUCTED FOR WIND ZONE: **2**

This home has not been designed for the higher wind pressure and anchoring provisions required for ocean/coastal areas and should not be located within 1500' of the coastline in Wind Zone II and III unless the home and its anchoring and foundation system have been designed for the increased requirements specified for Exposure D in ANSI/ASCE 7-88.

This home HAS ( ) HAS NOT ( X ) been equipped with storm shutters or other protective covering for windows and exterior door openings. For homes designed to be located in Wind Zone II and III which have not been provided with shutters or equivalent covering devices, it is strongly recommended that the home be made ready to be equipped with these devices in accordance with the method recommended in manufacturers printed instructions.

This home IS ( ) IS NOT ( X ) designed to accommodate the additional loads imposed by the attachment of an attached accessory building or structure in accordance with the manufacturer installation instructions. The additional loads are in accordance with the design load(s) identified on this Data Plate when applicable.

## BASIC WIND ZONE MAP

NOTE: See Section 3280.305(c) (2) for areas included in each Wind Zone  
DESIGN ROOF LOAD ZONE MAP North 40 PSF XX South 20 PSF

## COMFORT HEATING

This manufactured home has been thermally insulated to conform with the requirements of the federal manufactured home construction and safety standards for all locations within climate zone **1**

The above heating equipment manufacturer and model (see list at left):  
The central air conditioning system provided in this home has been sized assuring an orientation of the front (hitch end) of the home facing on this basis the system is designed to maintain an indoor temperature of 75 degrees F when outdoor temperatures are N/A degrees F.  
The above information has been calculated assuming a maximum wind velocity of 15 mph at standard atmosphere pressure.

## COMFORT COOLING

Air conditioning provided at factory (alternate I)  
Air conditioner manufacturer and model (see list at left):  
Certified capacity B.T.U. / hr. in accordance with the appropriate air conditioning and refrigeration institute standards.  
The central air conditioning system provided in this home has been sized assuring an orientation of the front (hitch end) of the home facing on this basis the system is designed to maintain an indoor temperature of 75 degrees F when outdoor temperatures are N/A degrees F dry bulb and wet bulb.  
The temperature to which this home can be cooled will change depending upon the amount of exposure of the windows of this home to the sun's radiant heat. Therefore, the homes heat gains will vary dependent upon its orientation to the sun and any permanent shading provided. Information concerning the calculation of cooling loads at various locations, window exposures and shadings are provided in Chapter 22 of the 1987 edition of the ASHRAE Handbook of Fundamentals. Information necessary to calculate cooling loads at various locations & orientations is provided in the special comfort cooling information provided with this home.

☒ Air conditioning not provided at factory (Alternate II)  
The air distribution systems of this home is suitable for the installation of central conditioning.  
The supply air distribution system installed in this home is sized for a manufactured home central air conditioning system of up to 43,221 B.T.U./hr. rated capacity which are certified in accordance with the appropriate air conditioning & refrigeration institute standards. when the air conditioners of such air conditioners are rated at 0.3 inch water column static pressure or greater for the cooling air delivered to the manufactured home supply air duct system. Information necessary to calculate cooling loads at various locations & orientations is provided in the special comfort cooling information provided with this manufactured home.

☐ Air conditioning not recommended (alternate III)  
The air distribution system of this home has not been designed in anticipation of its use with a central air conditioning system.

## INFORMATION PROVIDED BY THE MANUFACTURER NECESSARY TO CALCULATE SENSIBLE HEAT GAIN

Walls (without windows & doors)	"U"	.093
Ceilings and roofs of light color	"U"	.047
Ceilings and roofs of dark color	"U"	.047
Floors	"U"	.075
Air ducts in floor	"U"	N/A
Air ducts in ceiling	"U"	.144
Air ducts installed outside the home	"U"	.46
The following are the duct areas in this home		
Air ducts in floor	N/A	square feet
Air ducts in ceiling	202.48	square feet
Air ducts outside the home	176.45	square feet

To determine the required capacity of equipment to cool a home efficiently and economically, a heating load (heat gain) calculation is required. The cooling load is dependent of the orientation location & the structure of the home. Central air conditioners operate most efficiently & provide the greatest comfort when their capacity closely approximates the calculated cooling load. Each homes air conditioner should be sized in accordance with Chapter 22 of the American Society of Heating, Refrigerating and Air Conditioning Engineers (ASHRAE) Handbook of Fundamentals once the location & orientation are known.
