Span Notes:

1. The allowable spans for primary roof members shall be multiplied by a factor of 0.9 for horizontal roof members (i.e. not mansard or gable style roofs).
2. L/W shall be less than or equal to 1 (one) where L is the length of the structure perpendicular to the existing host structure and W is the width of the structure parallel to the existing host structure. See roof bracing detail for illustration. If L/W exceeds 1 (one), then the allowable primary and secondary wall spans shall be multiplied by a factor of 0.9.
3. Interpolation between values in all tables is permitted.

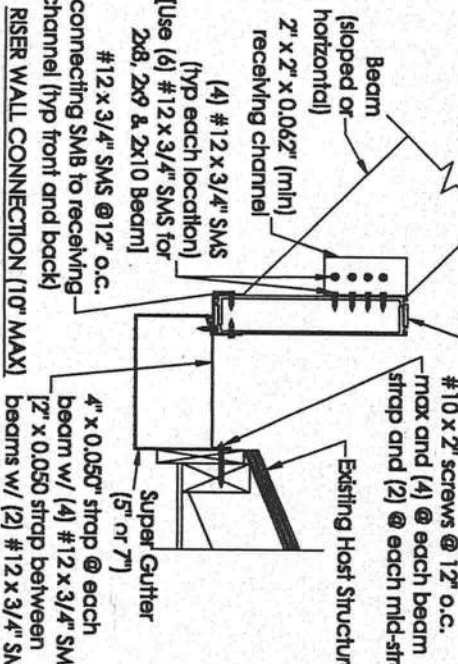

Note: Use Trib Width of Secondary Member in the Allowable Span Tables for Secondary Members to find the allowable length of the secondary member. For Example,

Notes: 0.5" (min) (typ) distance from edge of slab to center of screw is 2 inches min.

2. Connection may be used on side of slab. Minimum 2" edge distance shall be maintained from all concrete edges.

ALTERNATE CABLE-TO-DECK CONNECTION

Notes: 1. Distance from edge of slab to center of screw is 2 inches min.

2. Connection may be used on side of slab. Minimum 2" edge distance shall be maintained from all concrete edges.
