

My husband & I will be the owner/contractors and are building our building in stages. We have uploaded plans that contain current and future plans. For financial reasons, we need to complete the building in stages. So to clarify the permits we are currently requesting are for the foundation (we are getting our bid from a contractor that Elite uses in Columbia County & has FL license/insurance), the building shell (by Elite Metal LLC, Live Oak) and the entire 1 bedroom 1 & ½ bath residence section of the building that will take up approximately 973 sq feet of the building. The rest of the building interior will be unfinished and started with permits at a later date. For the resident section of the building, which will be our home, we are getting bids for the plumbing & HVAC systems from contractors that are listed as active on the county website. We have included a marked up drawing below, please contact us if you have any questions. Thank you for your time, we look forward to getting started on our building!
