POCKET PENETROMETER TEST

The pocket penetrometer tests are rounded down to 500 psf or check here to declare 1000 lb soil without testing.

x 1500 x 1500 x 500

POCKET PENETROMETER TESTING METHOD

1. Test the perimeter of the home at 6 locations.
2. Take the reading at the depth of the footer.
3. Using 500 lb increments, take the lowest reading and round down to that increment.

x 1500 x 1500 x 500

TORQUE PROBE TEST

The results of the torque probe test is 20.5 inch pounds or check here if you are declaring 5' anchors without testing 40. A test showing 27.5 inch pounds or less will require 4 foot anchors.

Note: A state approved lateral arm system is being used and 4 ft. anchors are allowed at the sidewall locations. I understand 5 ft anchors are required at all centerline tie points where the torque test reading is 27.5 or less and where the mobile home manufacturer may requires anchors with 4000 lb holding capacity.
