### THERMAL PERFORMANCE — ATTIC BLOW-IN APPLICATION

- In accordance with the chart above, you must install the minimum number of bags per 1,000 sq. ft. of net area for each R-Value listed.
- The maximum net coverage must not exceed that specified for each R-Value.
- The insulation must be installed at or above the specified installed thickness for each R-Value.
- Failure to install the required minimum weight per sq. ft. of insulation at or above the initial installed thickness will result in reduced R-Value.
- CertainTeed does not recommend or approve of blending or adding additional materials or adhesives with this product during installation. CertainTeed will accept no responsibilities or liabilities when the product is not installed in accordance with the product label and installation instructions. The installing contractor assumes sole responsibility and liability for proper application.
