POCKET PENETROMETER TEST

The pocket penetrometer tests are rounded down to psf or check here to declare 1000 lb. soil without testing.

X 2000 X 2000 X 2500

POCKET PENETROMETER TESTING METHOD

1. Test the perimeter of the home at 6 locations.
2. Take the reading at the depth of the footer.
3. Using 500 lb. increments, take the lowest reading and round down to that increment.

X 2000 X 2000 X 2000

TORQUE PROBE TEST

The results of the torque probe test is 300 inch pounds or check here if you are declaring 5' anchors without testing. A test showing 275 inch pounds or less will require 4 foot anchors.

Note: A state approved lateral arm system is being used and 4 ft. anchors are allowed at the sidewall locations. I understand 5 ft anchors are required at all centerline tie points where the torque test reading is 275 or less and where the mobile home manufacturer may requires anchors with 4000 lb holding capacity.

Mr. Kerce:

Per our inspection this property is currently gaining access by way of a legally permitted connection point and is up to current FDOT code for current access use. The new driveway connection was inspected today and has passed FDOT inspection.

Please accept this as our notice of same and lift any Columbia County Permit restrictions that may have applied to this site due to State FDOT Access compliances.

If further information is required on this project please do not hesitate to contact this office for additional access permitting information details. My office number is 961-7193 or 961-7180.
