Re: Elevation Information for the Proposed Finish Floor of the Residence Being Constructed on the Theresa & Troy Adams Property, Having Columbia County Tax Parcel No. 30-7S-17-10058-651

Dear Jason,

We went to the referenced site on October 5, 2020 to establish the elevation information of the top of the erected form boards for the foundation of the referenced residence, and the centerline of the adjacent road to the south.

Using a Champion real time corrected GPS receiver/system in conjunction with the real time correction signals available via mobile telephone connection with the F.D.O.T., Florida Permanent Reference Network, using stations GNVL, LKCY and FKBF, we established the following elevations:

Elevation of the top of the erected form boards: 58.1 Feet NAVD'88

Elevation of the centerline of the road 130 feet+/- to the south: 54.2 Feet NAVD'88

Please contact me if you have any questions or need additional information.

Thank you.

(M.F.F. Elevation is 46')

Such a large difference, ok to use this letter.
