RE: DESIGN FINISHED FLOOR ELEVATION (FFE) vs ACTUAL FINISHED FLOOR ELEVATION; BETHLEHEM COMMUNITY CENTER

Mr. Crews,

The design FFE of the Bethlehem Community Center, as stated on the construction plans, was to be 104.25'. The actual FFE, as determined by field survey, was 104.20'. This difference is less than 5/8" and is within allowable construction tolerances for this project and doesn't adversely impact the use and function of the facility.

If you have any questions, do not hesitate to contact me.

Sincerely,

Robert P Bishop
