POCKET PENETROMETER TEST

The pocket penetrometer tests are rounded down to _____ psf or check here to declare 1000 lb. soil XX without testing.

X _____ X _____ X _____

POCKET PENETROMETER TESTING METHOD

1. Test the perimeter of the home at 6 locations.
2. Take the reading at the depth of the footer.
3. Using 500 lb. increments, take the lowest reading and round down to that increment.

X _____ X _____ X _____

TORQUE PROBE TEST

The results of the torque probe test is 250 inch pounds or check here if you are declaring 5' anchors without testing. A test showing 275 inch pounds or less will require 4 foot anchors.

Note: A state approved lateral arm system is being used and 4 ft. anchors are allowed at the sidewall locations. I understand 5 ft anchors are required at all centerline the points where the torque test reading is 275 or less and where the mobile home manufacturer may requires anchors with 4000 lb holding capacity.

Installer's initials

ALL TESTS MUST BE PERFORMED BY A LICENSED INSTALLER

Installer Name

William Puckett

Date Tested

3-15-04

Electrical

Connect electrical conductors between multi-wide units, but not to the main power source. This includes the bonding wire between multi-wide units. Pg. 15-C

Plumbing

Connect all sewer drains to an existing sewer tap or septic tank. Pg. 15-D

Connect all potable water supply piping to an existing water meter, water tap, or other independent water supply systems. Pg. 15-C

Site Preparation

Debris and organic material removed Yes
Water drainage: Natural XX Swale _____ Pad _____ Other _____

Fastening multi wide units

Floor: Type Fastener: 18x5" Length: _____ Spacing: 24"OC
Walls: Type Fastener: 1/2" Length: _____ Spacing: 24"OC
Roof: Type Fastener: metal Length: 104 Spacing: Galvalume
For used homes a min. 30 gauge, 8" wide, galvanized metal strip will be centered over the peak of the roof and fastened with galv. roofing nails at 2" on center on both sides of the centerline.

Gasket (weatherproofing requirement)

I understand a properly installed gasket is a requirement of all new and used homes and that condensation, mold, mildew and buckled marriage walls are a result of a poorly installed or no gasket being installed. I understand a strip of tape will not serve as a gasket.

5' anchor on 5'4" oc

Installation of Longitudinal System (Figure 1)

1. Identify the number of systems to be used on the home using the chart provided.
2. Identify on the location where the longitudinal systems will be installed.
3. Clear all organic matter and debris from the pad site.
4. Place pad centered under beam using the centering mark imprinted on the pad.
5. Press or drive pan into ground until level and flush with prepared surface.
6. Slide Xi-System pier feet into slots in pad so that the Xi-system pier is centered under the I-beam.
7. Raise telescoping extension post to contact the bottom of I-beam, secure with bolt provided, tighten bolt nut. (Figure 1)
8. Turn hex nut on pier height adjuster until Xi-System pier is rigid between pad and I-beam.
9. Install Gator Beam clamps to I-beam on each side of the Xi-System pier. Do not tighten nuts at this time. (Figure 2)
10. Connect struts (open side down) to each side of the Xi-System pier using the U-bolt provided. Struts are attached to the upper hole in each pier leg and to the flanges on the beam clamps. (Figure 1)
11. Tighten all nuts and bolts on the struts and beam clamps.

1. Assemble lateral strut by sliding smaller (1-1/2") tube into the larger (1-3/4") tube. Holes should be on the sides of the larger tube and the "flag" up on the smaller tube.
2. Attach the end of the larger tube to the bracket mounted in the center of the pad, using the grade 5, 1/2" x 2-1/2" bolt/nut provided.
3. Attach the flag end of the smaller tube to the opposite I-beam using the "J" bolt over the top of the I-beam with the nut & washer provided. (Figure 4)
4. Install a minimum of four (1/4" x 3/4") self-tapping screws into the holes provided in the lateral strut so that the two tubes are connected together. (Figure 1)

Installation of Lateral System (Figure 3)

Longitudinal Stabilization for Florida

When using longitudinal stabilization only, sidewall perimeter anchors with diagonal ties and stabilizer plates must be used on the home. Vertical ties are also required on homes supplied with vertical tie connections points (per Florida regulations).

Triple Section
or Double w/tag up to 48' Nominal

Double Section
Up to 32' Nominal

Single Section
Up to 16' Nominal

Typical Placement

When the XI-System is used only as longitudinal stabilization, systems must be as evenly spaced as possible, no more than 16' from the end of the home. Maximum roof slope for single units & double section is 5/12, for triple sections is 3.5/12, for the above number of systems.

Combining Longitudinal and Lateral Stabilization for Florida

- Sidewall anchors with vertical ties every 5' 4" per Florida requirements
- Roof slope of 20 degrees or less (See chart for 5/12 roof installations).
- Single and double section homes require the same number of systems
- Triple section homes and double section homes with tag units require two additional longitudinal systems
- Diagram represents single section up to 16' width, double section up to 32' width, and triple section homes up to 48' width.
- NOTE: Older homes without vertical tie attachments, require diagonal frame ties/anchors/plates every 5'-4" per Florida regulations

XI Block System Assembly

Side View

Xi-Steel Pier System Installation Instructions By Tie Down Engineering

Installation instructions for longitudinal and lateral stabilization of manufactured homes set to specifications of the State of Florida.

- Easy installation
- 3 square foot pad and Xi-system replace standard support pier and base pad
- Screw type pier adjusters... no need to use installation jacks to adjust home to system

Steel Pier Systems P/N's
 #59321 Xi, 12" Pier
 #59314 Xi, 25.5" Pier
 #59317 Xi, 36" Pier
 #59315 Xi, 6' Lateral Strut
 #59318 Xi, 6' Lateral Strut
Block Pier Systems P/N's
 #59319 Xi, Lateral w/5' Strut
 #59320 Xi, Lateral w/6' Strut

REQUIREMENTS

- Installation can be made in any type of soil, 4B or better
- Florida requires 5' 4" anchor spacing for vertical ties
- 4' ground anchors are used with the Xi-system in 4A and 4B soils, except at shear wall or marriage wall locations where loads exceed 3150 pounds. Florida requires that 5' anchors be used at these locations.
- Center line or shear wall anchors, that may be required by specific manufacturers, are to be sized according to soil torque conditions. Follow all manufacturers instructions for anchor type and placement in addition to Florida regulations.
- Maximum height is a 96" projection. Higher walls may be used, when the design loads are adjusted accordingly.
- Maximum roof eave is 16"
- Main rill spacing must be 99.5" or less
- Maximum pier height of the Xi-system is 48"
- Instructions are not for use on "Exposure D" homes within 1500 feet of the coastline
- Installation instructions are based on 4200# per pad longitudinal load and 6000# per pad lateral load with one diagonal tie/stabilizer.
- Additional vertical anchor ties that are unique to a home's design may be required by the home manufacturer. These locations include shear walls, marriage line ridge beam support posts, and rim plates.

CORRECTED QUIT CLAIM DEED

THIS INDENTURE made this 6th day of October, 2003, between, Grantors, **MICHAEL LOPEZ and DAWN WEESE**, as joint tenants with right of survivorship, whose address is 272 SW Coyote Circle, Fort White, County of Columbia, Florida 32038, as party of the first part, and, Grantee, **MICHAEL LOPEZ**, whose address is Route 4, Box 4434, of Fort White, County of Columbia, State of Florida, 32038, as party of the second part,

WITNESSETH, that the Grantors, for and in consideration of the sum of **TEN DOLLARS (\$10.00)** in hand paid by the Grantee, at or before the ensealing and delivery of these presents, the receipt whereof is hereby acknowledged, has remised, released, and quitclaimed, and by these presents do remise, release, and quitclaim unto the said party of the second part, all the right, title, and interest claim and demand which the said party of the first part has in and to the following described lot, piece, or parcel of land, situate, lying and being in the County of Columbia, State of Florida, recorded at Official Record Book 799, Page 446, to wit:

Township 5 South, Range 16 East, Section 30: NW 1/4 of NE 1/4 of SE 1/4 containing 10.15 acres more or less. (AKA Lot 15 Jr. Dick Tract UNR)

Note: This deed is to correct legal description for deed filed in Official Record Book 995, Page 1713.

TO HAVE AND TO HOLD the same, together with all and singular the appurtenances thereunto belonging or in anywise appertaining, and all the estate, right, title, interest and claim whatsoever of the Grantors, either in law or equity, to the only proper use, benefit and behoof of the Grantee,

IN WITNESS WHEREOF, the Grantors have hereunto set their hand and seal the day and year first above written.
