## Addressing Maintenance

To maintain the Countywide Addressing Policy you must make application for a 9-1-1 Address at the time you apply for a building permit. The established standards for assigning and posting numbers to all principal buildings, dwellings, businesses and industries are contained in Columbia County Ordinance 2001-9. The addressing system is to enable Emergency Service Agencies to locate you in an emergency, and to assist the United States Postal Service and the public in the timely and efficient provision of services to residents and businesses of Columbia County.

**To Whom It May Concern:**

**Please be advised due to the current building codes we will install a large capacity diaphragm tank on all new wells. This will provide a minimum one minute draw down or one minute refill. If a smaller diaphragm tank is used then we will install a cycle stop valve on the system which will produce the same results. Please call our office if you have any questions.**

**Thank you,**

POCKET PENETROMETER TEST

The pocket penetrometer tests are rounded down to 1100 psi or check here to declare 1000 lb. soil ☒ without testing.

X 1.0 X 1.0 X 1.0

POCKET PENETROMETER TESTING METHOD

1. Test the perimeter of the home at 6 locations.
2. Take the reading at the depth of the footer.
3. Using 500 lb. increments, take the lowest reading and round down to that increment.

X 1.0 X 1.0 X 1.0

TORQUE PROBE TEST

The results of the torque probe test is 1100 inch pounds or check here if you are declaring 5' anchors without testing. A test showing 275 inch pounds or less will require 5 foot anchors.

Note: A state approved lateral arm system is being used and 4 ft. anchors are allowed at the sidewall locations. I understand 5 ft anchors are required at all centerline tie points where the torque test reading is 275 or less and where the mobile home manufacturer may require anchors with 4000 lb holding capacity.
