RE: Application # 1107-46
New Anglican Church
Application # 1107-46, Milton Builders

A plan review was performed of the proposed construction of New Anglican Church building to be located 282 SW Magical Tarras, in Lake City, Florida. This building was classified under Chapter 12, New Assembly, of the Florida Fire Prevention Code, 2007 Edition. I recommend Approval of the building with the following conditions;

- Building Address
 - New and existing buildings shall have approved **address numbers** placed in a position to be plainly legible and visible from the street or road, in contrast with their background. At the minimum, numbers shall be not less than 3 inches in height for residential buildings and at least 6 inches in height for all other buildings. *NFPA 1:10.13.1.1 & NFPA 1:10.13.1.2*
- Door Hardware
 - All **exit or exit access doors** shall be arranged to open readily from the egress side whenever the building is occupied. **Locks or latches** if provided shall not require the use of a key, tool, or special knowledge or effort for operation from the egress side. The releasing mechanism for any latch shall be located not less than 34 in and not more than 48 in above the finished floor. The door must not require more than 1 action to open. *NFPA 1:14.5.2.2*
 - Any door in a required means of egress from an area having an occupant load of 100 or more persons shall be permitted to be provided with a latch or lock only if latch or lock is panic hardware or fire exit hardware complying with 7.2.1. *NFPA 12.2.2.2.3*
- Portable Fire Extinguishers
 - **Portable fire extinguishers** requires a license or permit of organizations and individuals who service, recharge, test, mark, inspect, install, or hydro test fire extinguishers. It will be necessary to use a Licensed Fire Extinguisher Contractor for identifying the location and type of extinguisher to use. *FSS 633.061*

SUBCONTRACTOR VERIFICATION FORM

APPLICATION NUMBER 1107-46 CONTRACTOR Jay Milton PHONE 386 755 582

THIS FORM MUST BE SUBMITTED PRIOR TO THE ISSUANCE OF A PERMIT

In Columbia County one permit will cover all trades doing work at the permitted site. It is **REQUIRED** that we have records of the subcontractors who actually did the trade specific work under the permit. Per Florida Statute 440 and Ordinance 89-6, a contractor shall require all subcontractors to provide evidence of workers' compensation or exemption, general liability insurance and a valid Certificate of Competency license in Columbia County.

Any changes, the permitted contractor is responsible for the corrected form being submitted to this office prior to the start of that subcontractor beginning any work. Violations will result in stop work orders and/or fines.

Columbia County Building Permit Application

TIME LIMITATIONS OF APPLICATION : An application for a permit for any proposed work shall be deemed to have been abandoned 180 days after the date of filing, unless such application has been pursued in good faith or a permit has been issued; except that the building official is authorized to grant one or more extensions of time for additional periods not exceeding 90 days each. The extension shall be requested in writing and justifiable cause demonstrated.

TIME LIMITATIONS OF PERMITS: Every permit issued shall become invalid unless the work authorized by such permit is commenced within 180 days after its issuance, or if the work authorized by such permit is suspended or abandoned for a period of 180 days after the time work is commenced. A valid permit receives an approved inspection every 180 days. Work shall be considered not suspended, abandoned or invalid when the permit has received an approved inspection within 180 days of the previous approved inspection.

FLORIDA'S CONSTRUCTION LIEN LAW: Protect Yourself and Your Investment: According to Florida Law, those who work on your property or provide materials, and are not paid-in-full, have a right to enforce their claim for payment against your property. This claim is known as a construction lien. If your contractor fails to pay subcontractors or material suppliers or neglects to make other legally required payments, the people who are owed money may look to your property for payment, even if you have paid your contractor in full. This means if a lien is filed against your property, it could be sold against your will to pay for labor, materials or other services which your contractor may have failed to pay.

NOTICE OF RESPONSIBILITY TO BUILDING PERMITEE: **YOU ARE HEREBY NOTIFIED** as the recipient of a building permit from Columbia County, Florida, you will be held responsible to the County for any damage to sidewalks and/or road curbs and gutters, concrete features and structures, together with damage to drainage facilities, removal of sod, major changes to lot grades that result in ponding of water, or other damage to roadway and other public infrastructure facilities caused by you or your contractor, subcontractors, agents or representatives in the construction and/or improvement of the building and lot for which this permit is issued. No certificate of occupancy will be issued until all corrective work to these public infrastructures and facilities has been corrected.

WARNING TO OWNER: YOUR FAILURE TO RECORD A NOTICE OF COMMENCEMENT MAY RESULT IN YOU PAYING TWICE FOR IMPROVEMENTS TO YOUR PROPERTY. A NOTICE OF COMMENCEMENT MUST BE RECORDED AND POSTED ON THE JOB SITE BEFORE THE FIRST INSPECTION. IF YOU INTEND TO OBTAIN FINANCING, CONSULT WITH YOUR LENDER OR ATTORNEY BEFORE RECORDING YOUR NOTICE OF COMMENCEMENT.

OWNERS CERTIFICATION: I CERTIFY THAT ALL THE FOREGOING INFORMATION IS ACCURATE AND THAT ALL WORK WILL BE DONE IN COMPLIANCE WITH ALL APPLICABLE LAWS REGULATING CONSTRUCTION AND ZONING.

NOTICE TO OWNER: There are some properties that may have deed restrictions recorded upon them. These restrictions may limit or prohibit the work applied for in your building permit. You must verify if your property is encumbered by any restrictions or face possible litigation and or fines.

(Owners Must Sign All Applications Before Permit Issuance.)

Owners Signature [Signature] ****OWNER BUILDERS MUST PERSONALLY APPEAR AND SIGN THE BUILDING PERMIT.**

CONTRACTORS AFFIDAVIT: By my signature I understand and agree that I have informed and provided this written statement to the owner of all the above written responsibilities in Columbia County for obtaining this Building Permit including all application and permit time limitations.

Offstreet parking: handicapped parking spaces. Except as otherwise specified herein, required offstreet parking areas shall have a number of level parking spaces, as set forth in the following table, identified by above-grade signs as being reserved for physically handicapped persons. Each parking space so reserved shall be not less than twelve (12) feet in width and twenty (20) feet in length.

Parking Spaces for Handicapped

<u>Total # of Spaces</u>	<u>Number of Handicapped Spaces Required</u>
up to 25	1
26 to 50	2
51 to 75	3
76 to 100	4
101 to 150	5
151 to 200	6
201 to 300	7
301 to 400	8
401 to 500	9
501 to 1,000	2% of total
over 1,000	20 plus 1 for each 100 over 1,000

Parking spaces for the physically handicapped shall be located as close as possible to elevators, ramps, walkways, and entrances. These parking spaces should be located so that physically handicapped persons are not compelled to wheel or walk behind parked cars to reach entrances, ramps, walkways, and elevators. (See Section 4.2.2 for additional provisions regarding accessibility for physically handicapped persons.)

****WARNING**** READ AND FOLLOW ALL NOTES ON THIS SHEET!
****IMPORTANT**** FURNISH THIS DESIGN TO ALL CONTRACTORS INCLUDING INSTALLERS.

Trussess require extreme care in fabricating, handling, shipping, installing and bracing. Refer to the latest edition of BC31 (Building Component Safety Information, by IPI and MICA) for all bracing notes prior to performing these functions. Installers shall provide temporary bracing per the bracing notes otherwise, top chord shall have properly attached structural sheathing and bottom chord shall have properly attached structural sheathing and bottom lateral restraint of the truss. All wall bracing installed per BC31 sections B317 or B104, as applicable.

The Building Components Group (BCG) (114893) shall not be responsible for any deviation from this design. The responsibility for the design shall be with the manufacturer of the truss. In the event of any failure to build the truss in conformance with ANSI/APA Truss Plate Institute (TPI) National Design Specification (NDS) for Wood Construction, the responsibility shall be with the manufacturer of the truss. Apply plates to each face of truss and position as shown above and on the Joist and Rafter Details, unless noted otherwise. Refer to drawings 160A-2 for standard plate positions. A seal over the drawing or cover page listing this drawing, indicating acceptance of professional engineering responsibility is solely for the design shown. The applicability and use of this design for any structure is the responsibility of the user. For more information, contact the Building Components Group. This drawing is a general notes page. (114-BQ); www.114BQ.com; TPI: www.tpi.net; MICA: www.mica-inc.org. This drawing is not for construction.

WARNING READ AND FOLLOW ALL NOTES ON THIS SHEET!
FURNISH THIS DESIGN TO ALL CONTRACTORS INCLUDING INSTALLERS.
IMPORTANT

IMPORTANT FURNISH THIS DESIGN TO ALL CONTRACTORS INCLUDING INSTALLERS.

Trusses require extreme care in fabricating, handling, shipping, installing and bracing. Installer shall follow the latest edition of BCSI (Building Component Safety Information, by IP1 and NICA) for safety requirements prior to performing these functions. Installers shall provide temporary bracing per BCSI. If no BCSIs are noted otherwise, top chord shall have properly attached structural sheathing and bottom chord shall have a properly attached rigid ceiling. Braces shall be installed for permanent lateral restraint; webbing shall have braces installed per BCSI sections B3, B7 or B10, as applicable.

ITW Building Components Group Inc. (ITWBCG) shall not be responsible for any deviation from the design shown on drawings 106A-1 through 106D-2 or any other drawings or specifications. ITWBCG shall have drafting inspected per local building codes and all applicable codes.

The user's responsibility is to ensure that the truss is installed in accordance with the design shown on drawings 106A-1 through 106D-2 for standard plate positions. A seal will be provided for each truss indicating the position of the plates. The user must follow the instructions and details, unless noted otherwise. Refer to drawings 106A-2 for standard plate positions. A seal will be provided on the drawing or cover page listing this drawing. Indicates acceptance of professional engineering responsibility solely for the design shown. The suitability and use of this design for any structure is the responsibility of the Building Designer per MB31/JPI 1 Sec.2. For more information see: This Job's general notes page; ITW-BCG: www.bcg-group.com; JPI: www.jpi-inc.net; NICA: www.nicaindust.com;

PEAK, SPLICE, AND HEEL PLATE.

***WARNING** READ AND FOLLOW ALL NOTES ON THIS SHEET
Trusses require extreme care in fabricating, handling, shipping and installation. Please refer to the following information to follow BCSI Building Component Safety Information, by properly performing these functions. Installers shall provide temporary bracing to support the trusses until they are properly braced. Otherwise, top chord shall have properly attached structural members to support the trusses. Locations shown for properly attaching top chord are shown in the drawings. Properly bracing installed per BCSI sections B3 & B7. See this job for details.

System	13-407	HVAC Load sizing has been performed	☐
Reheat	13-407.B	Electric resistance reheat prohibited	☐
HVAC Efficiency	13-407, 13-408	Minimum efficiencies: Cooling Tables 13-407.AB.3.2.1A-D; Heating Tables 13-407.AB.3.2.1B, 13-407.AB.3.2.1D, 13-408.AB.3.2.1E, 13-408.AB.3.2F	☐
HVAC Controls	13-407.AB.2	Zone controls prevent reheat (exceptions); simultaneous heating and cooling in each zone; combined HAC deadband of at least 5°F (exceptions)	☐
Ventilation Controls	13-409.AB.3	Motorized dampers reqd, except gravity dampers OK in: 1) exhaust systems and 2) systems with design outside air intake or exhaust capacity ≤300 cfm	☐
ADS	13-410	Duct sizing and Design have been performed	☐
HVAC Ducts	13-410.AB	Air ducts, fittings, mechanical equipment & plenum chambers shall be mechanically attached, sealed, insulated & installed per Sec. 13-410 Air Distribution Systems	☐
Balancing	13-410.AB.4	HVAC distribution system(s) tested & balanced. Report in construction documents	☐
Piping Insulation	13-411.AB	In accordance with Table 13-411.AB.2	☐
Water Heaters	13-412.AB	Performance requirements in accordance with Table 13-412.AB.3. Heat trap required	☐
Swimming Pools	13-412.AB.2.6	Cover on heated swimming pools: Time switch (exceptions); Readily accessible on/off switch	☐
Hot Water Pipe Insulation	13-411.AB.3	Table 13-411.AB.2 for circulating systems, first 8 feet of outlet pipe from storage tank and between inlet pipe and heat trap	☐
Water Fixtures	13-412.AB.2.5	Shower hot water flow restricted to 2.5 gpm at 80 psi. Public lavatory fixture hot water flow 0.5 gpm max; if self-closing valve 0.25 gallon recirculating, 0.5 gallon non recirculating	☐
Motors	13-414	Motor efficiency criteria have been met	☐
Lighting Controls	13-415.AB	Automatic control required for interior lighting in buildings >5,000 s.f.; Space control; Exterior photo sensor; Tandom wiring with 1 or 3 linear fluourescent lamps>30W	☐

EnergyGauge Summit® v3.22
