Application is hereby made to obtain a permit to do work and installations as indicated. I certify that no work or installation has commenced prior to the issuance of a permit and that all work be performed to meet the standards of all laws regulating construction in this jurisdiction.

#### **Columbia County Building Permit Application**

TIME LIMITATIONS OF APPLICATION: An application for a permit for any proposed work shall be deemed to have been abandoned 180 days after the date of filing, unless such application has been pursued in good faith or a permit has been issued; except that the building official is authorized to grant one or more extensions of time for additional periods not exceeding 90 days each. The extension shall be requested in writing and justifiable cause demonstrated.

FLORIDA'S CONSTRUCTION LIEN LAW: Protect Yourself and Your Investment

According to Florida Law, those who work on your property or provide materials, and are not paid-in-full, have a right to enforce their claim for payment against your property. This claim is known as a construction lien. If your contractor fails to pay subcontractors or material suppliers or neglects to make other legally required payments, the people who are owed money may look to your property for payment, even if you have paid your contractor in full. This means if a lien is filed against your property, it could be sold against your will to pay for labor, materials or other services which your contractor may have failed to pay.

NOTICE OF RESPONSIBILITY TO BUILDING PERMITEE:

<u>YOU ARE HEREBY NOTIFIED</u> as the recipient of a building permit from Columbia County, Florida, you will be held responsible to the County for any damage to sidewalks and/or road curbs and gutters, concrete features and structures, together with damage to drainage facilities, removal of sod, major changes to lot grades that result in ponding of water, or other damage to roadway and other public infrastructure facilities caused by you or your contractor, subcontractors, agents or representatives in the construction and/or improvement of the building and lot for which this permit is issued. No certificate of occupancy will be issued until all corrective work to these public infrastructures and facilities has been corrected.

WARNING TO OWNER: YOUR FAILURE TO RECORD A NOTICE OF COMMENCMENT MAY RESULT IN YOU PAYING TWICE FOR IMPROVEMENTS TO YOUR PROPERTY. A NOTICE OF COMMENCEMENT MUST BE RECORDED AND POSTED ON THE JOB SITE BEFORE THE FIRST INSPECTION. IF YOU INTEND TO OBTAIN FINANCING, CONSULT WITH YOUR LENDER OR ATTORNEY BEFORE RECORDING YOUR NOTICE OF COMMENCEMENT.

OWNERS CERTIFICATION: I hereby certify that all the foregoing information is accurate and all work will be done in compliance with all applicable laws and regulating construction and zoning. I further understand the above written responsibilities in Columbia County for obtaining this Building Permit.

Brian J. Martucci, Product Manager Alside 3773 State Road Cuyahoga Falls, Ohio 44223

RE: Vinyl Siding per Florida Building Code 2004

Dear Mr. Martucci:

The following Alside Vinyl siding product; Odyssey Plus has been tested and analyzed in conformance with ASTM D 3679 as required by Florida Building Code 2004, paragraph This product has been accepted by the Southern Building Code Congress International and is listed in SBCCI Evaluation Report No. 2241. This product type is both double 4" and double 5" in Clapboard and Dutchlap surface configurations.

Double 4", with fasteners at 16" spacing, Clapboard results in allowable design wind pressures of +/- 42.3 psf with nails, +/-46.7 psf with staples; Dutchlap results in +/- 42.3 psf with nails, +/- 100.0 psf with staples. Nails are roofing nails1-1/2" long with 1/8" diameter shanks and 3/8" diameter heads. Staples are 1-1/2" long by 1/2" wide by 16 gauge. Sheathing must be placed behind the siding, and study must be at a 16" maximum spacing. If sheathing is not placed behind the siding, all of the above pressures will be 1/2 of those listed.

Double 5", with fasteners at 16" spacing, Clapboard results in allowable design wind pressures of +/- 37.7 psf with neils, +/-37.7 psf with staples; Dutchlap results in +/- 33.3 psf with nails. Nails and staples are the same as in the above paragraph. Sheathing must be placed behind the siding, and study must be at a 16" maximum spacing. If sheathing is not placed behind the siding, all of the above pressures will be 1/2 of those listed.

The above allowable design wind pressures are in conformance with Florida Building Code 2004, Tables 1609.6B and 1609.6D. I trust that this information is sufficient for your needs. If there are any questions about this, please contact me.

Sincerely yours;

allen M. R Allen N. Reeves, P.E.

Chief Engineer
