**POCKET PENETROMETER TEST**

The pocket penetrometer tests are rounded down to 1500 psf or check here to declare 1000 lb. soil        without testing.

X 1200 X 1200 X 1200

**POCKET PENETROMETER TESTING METHOD**

1. Test the perimeter of the home at 6 locations.
2. Take the reading at the depth of the footer.
3. Using 500 lb. increments, take the lowest reading and round down to that increment.

**TORQUE PROBE TEST**

The results of the torque probe test is 2800 inch pounds or check here if you are declaring 5" anchors without testing       . A test showing 275 inch pounds or less will require 5 foot anchors.

Note: A state approved lateral arm system is being used and 4 ft. anchors are allowed at the sidewall locations. I understand 5 ft anchors are required at all centerline tie points where the torque test reading is 275 or less and where the mobile home manufacturer may requires anchors with 4000 lb holding capacity.
