Product/Service	Description	Qty.
Foundation Repair Assessment	On February 6 a representative from Stable Foundation Solutions visited the site, met with the homeowner to evaluate the foundation issues of the home. The interior of the home shows obvious foundation settlement with no wall or tile cracking but a definite drop in elevation on the Southside of structure. Using a zip level it was determined that the foundation has dropped (3) inches along the south and west wall. All doors and windows are functioning properly. The slab underneath the house has several corners broken off. Please review quote and options below.	1
Permit & Engineering		1
M250 Push Pier	WE PROPOSE TO INSTALL (5) MODEL 250 PUSH PIERS IN EFFECTED AREA TO ATTEMPT TO LIFT AND STABILIZE. THE ABILITY TO LIFT THE FOUNDATION IS OUR PRIMARY GOAL ALTHOUGH IT IS SUBJECT TO THE FIELD CONDITIONS AND RESTORING TO ORIGINAL POSITION CAN NOT GUARANTEED. ALL PIERS WILL BE DRIVEN TO LOAD BEARING SOILS BASED ON ENGINEERS SPECIFICATIONS. SEE LIFE OF STRUCTURE TRANSFERABLE PIER WARRANTY.	5
