Water Filter		
Built-In Oven		
Smoke Detector	FIRST ALERT	9120B

Note: See Section 3280.3050(2) for areas included in each Wind Zone.
 This home has has not (checked by manufacturer) been equipped with storm shutters or other protective coverings for windows and exterior door openings. For homes designed to be located in Wind Zones II and III, which have not been provided with shutters or equivalent covering devices, it is strongly recommended that the home be made ready to be equipped with these devices in accordance with the method recommended in the manufacturers printed instructions.

This home has has not been designed for the higher wind pressures and anchoring provisions required for the ocean/coastal areas and should be located within 1500' of the coastline in Wind Zone II and III, unless the home and its anchoring and foundation system have been designed for the increased requirements specified for Exposure D in ANSVASCE 7-88.

Manufacturer shall provide "U" factors as designed below:

Walls (without windows & doors)	"U" =	0.090
Ceilings & roofs of light color	"U" =	0.070
Ceilings & roofs of dark color	"U" =	0.070
Floors	"U" =	0.090
Air Ducts in floor	"U" =	N/A
Air Ducts in ceiling	"U" =	0.238
Air Ducts installed outside	"U" =	0.125

Heat transfer area to outside of the home from air ducts located:
 A&B Section / C&D Section → Inside Home Sq. Ft. 248.74
 A&B Section / C&D Section → Outside Home Sq. Ft. 128.28

The heating equipment has the capacity to maintain an average 70° F temperature in this home at outdoor temperatures of _____° F.

To maximize furnace operating economy and to conserve energy, it is recommended that this home be installed where outdoor winter design temperature (97 1/2%) is not higher than _____° F.
 The above information has been calculated assuming a maximum wind velocity of 15 MPH at standard atmospheric pressure. The supply air distribution system installed in this home is sized:

Not designed for A/C A/C Ready A/C Installed

**** FOR TALLAHASSEE CENTRAL OFFICE USE ONLY ****
