POCKET PENETROMETER TESTING METHOD

The results of the torque probe test is inch pounds or check here if you are detecting 6 anchors without testing. A test showing 275 inch pounds or less will require 6 foot anchors.

Note: A state approved lateral arm system is being used and 4 ft. anchors are allowed at the selected locations. I understand 6 ft. anchors are required at all locations the probe where the torque test reading is 275 or less and where the mobile home manufacturer may require anchors with 4000 lb. loading capacity.
