# POCKET PENETROMETER TEST

The pocket penetrometer tests are rounded down to 2000 psi or check here to declare 1000 lb. soil without testing.

X 2000 X 2100 X 2100

## POCKET PENETROMETER TESTING METHOD

1. Test the perimeter of the home at 8 locations.
2. Take the reading at the depth of the footer.
3. Using 500 lb. increments, take the lowest reading and round down to that increment.

X 2000 X 2050 X 2000

## TORQUE PROBE TEST

The results of the torque probe test is 279 inch pounds or check here if you are declaring 5' anchors without testing. A test showing 275 inch pounds or less will require 5 foot anchors.

Note: A state approved lateral arm system is being used and 4 ft. anchors are allowed at the sidewall locations. I understand 5 ft. anchors are required at all centerline the points where the torque test reading is 275 or less and where the mobile home manufacturer may require anchors with 4000 lb holding capacity.
