JS

Brody,

I spoke with our Construction Office concerning this property and they are going to place fresh millings on the existing driveway at this location, the mitered end sections are acceptable and no additional improvements will be required. You are good to go!

Justin Sandlin

Good Morning Justin

Did you get a chance to review this?

Thanks,

Brody

Justin,

Good afternoon. This property is along the new resurfacing of FL-47. It is a replacement home that is using the already existing driveway. In the past when I have seen resurfacing projects I have seen the state do aprons for the existing driveways. Is that being done as part of this project? It currently doesn't have one but has a culvert (see photos and site plan below). Let me know if what they have works.
